[My Portfolio](#)

Experience Overview

AI & Software Developer

Self-Employed | Innovative AI systems and web applications tailored for diverse needs.

2024 – Present
(2 years)

- Developed AI automation tools, enhancing efficiency across various sectors.
- Integrated LLMs into applications, streamlining user experiences.
- Collaborated with clients to deliver tailored solutions, boosting satisfaction rates.
- Conducted research on emerging technologies to stay ahead of industry trends.

Full-Stack Developer

Various Projects
2023 – 2024
(1 year)

- Created comprehensive web platforms connecting users with services in real-time.
- Implemented responsive designs, improving accessibility on all devices.
- Managed database systems ensuring data integrity and security.
- Partnered with teams to align project goals with client objectives.

Education

BTech in Artificial Intelligence

Institution: D. Y. Patil
University, Pune

Year of Graduation: 2029

- Academic Excellence Award
- AI Research Grants
- Completed Capstone Project in AI Solutions

Key Skills

AI Engineering • Web Development •
Automation • Multi-Agent Systems •
Problem Solving

Certification

- Artificial Intelligence & Machine Learning Fundamentals — Completed foundational learning in AI, ML concepts, and model workflows.
- Python Programming Certification — Gained hands-on experience in Python programming, automation, and problem-solving.
- Web Development Certification — Learned frontend and backend web development concepts including HTML, CSS, JavaScript, and modern frameworks.
- Git & GitHub Certification — Developed skills in version control, collaboration, and repository management.
- Hackathon Participation Certificates — Participated in technical competitions and innovation-based hackathons focused on AI and software development.
- Prompt Engineering & Generative AI Certification — Learned AI prompting techniques, LLM workflows, and generative AI applications.

- I Participated in Total 8 Hackathon's and 3 hackathon's are undergoing.
- Win IntellihackX 2026 with role of Backend, Frontend & Research.
